

Machine Learning Fundamentals - Assignments

Assignment: Loan Defaulter Analysis & Prediction

Source Data: Loan_default_data.csv

Requirement:

- a. Analyse the credit score distribution using a histogram
- b. Analyse how credit scores differ between defaulters and non-defaulters using a box plot
- c. Predict whether a borrower is likely to default on a loan using Logistic Regression
- d. Generate Confusion matrix
- e. Compute Accuracy Score of the model
- f. Generate a Classification report and find the Precision, Recall & F1-score of the model.
