

Machine Learning Fundamentals - Assignments

Assignment: Sales forecast based on Advertising Spend using Linear Regression

Source Data: advertising_spend.csv

Sample Data:

Advertising Spend (\$)	Sales Revenue (\$)
2743.579875	10562.77514
8798.436865	29248.94671
7994.517614	28648.51617
6618.673163	22403.00689
8520.759118	33363.2003
8686.21259	35185.25565

Requirement:

- Predict product sales based on advertising spend using Linear Regression
- Generate a heat map of Advertising Spend Vs Sales Revenue
- Visualize the data as a scatter plot with a regression line
- Compute Mean Squared Error, Absolute Mean Error & R2 Score
